

BUGGY McFLY EXPLAINS: DNA BARCODING

Identifying bugs can be super difficult! There are millions of species and sometimes they look alike.

DNA BARCODE LIBRARY

Luckily, DNA barcodes can help!

THAT'S ME?

ANT#001

DNA barcodes are unique, each bug has a tag.

So, we can take a bug's tag...

then match it to a specific record

in the reference library of bug names!

WOAH THANKS!!

Barcodes are a quick and easy way to identify species!
